

The Cyber Helpline

The Cyber Helpline is a movement by the cyber security community to step in and fill the gap in support for victims of cybercrime and online harms. Our unique model allows us to harness the skills and expertise of the cyber security community and change lives by helping thousands of victims a month.

We provide a free, confidential helpline for individuals and sole traders. We help victims understand, contain, recover and learn from cyber attacks by linking them with cyber security technology & experts who provide relevant advice and guidance.

The Cyber Helpline also provides training on cybercrime for organisations across the UK.
