SECTION N1: Monitoring and Intervention Framework

N1.1 The Local Authority's approach to Financial Monitoring and Intervention

The Local Authority (LA) has a proactive approach to monitoring and intervention (M&I). The purpose of this approach is to identify schools experiencing financial pressures at an early stage, enabling appropriate support and action to be implemented before an overspend or other financial difficulties arise.

In most cases, potential financial concerns are identified through the LA's M&I process and the Council's Schools Business Support Service (SBSS) finance support meetings. Financial concerns may also be highlighted by schools themselves, the School Improvement Service or Internal Audit.

N1.2 The Framework

The current framework is available on Perspective Live via the following file path:
